

#### **HealthChoice Preventive Care Services**

Effective Oct. 1, 2025
Released 10.15.2025

Preventive services are provided for overall health maintenance, such as routine health/wellness exams and tests, vaccinations, well-baby care and well-childcare. Health screenings and wellness exams can discover problems you may not know you have. The earlier problems are found, the greater the opportunity for treatment.

The Department of Health and Human Services Affordable Care Act has defined preventive services, to be covered with no cost-share, as described in the U.S. Preventive Services Task Force A and B recommendations, the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC), and certain guidelines for infants, children, adolescents and women supported by the Health Resources and Services Admin (HRSA) Guidelines including the American Academy of Pediatrics Bright Futures periodicity guidelines.

Certain services can be done for preventive or diagnostic reasons. When a service is performed for the purpose of preventive screening and is appropriately reported, it will be considered under the HealthChoice preventive care services benefit. Diagnostic services are considered under the HealthChoice standard plan benefits.

Preventive services are those performed on a person who has not had the preventive screening done before and does not have symptoms or other studies suggesting abnormalities, has had screening done within the recommended interval with the findings considered normal, or has had diagnostic services results that were normal after which the physician recommendation is for future preventive screening studies using the preventive services intervals.

Diagnostic services are services that are performed on a person who had a previous preventive or diagnostic study which identified an abnormality that requires additional diagnostic studies, or a recommendation was made for a repeat of the same studies within shortened time intervals from the recommended preventive screening time intervals, or who had a symptom(s) that required further diagnosis or does not fall within the applicable population for a recommendation or guideline.

HealthChoice covers qualifying preventive care services at 100% of allowable amounts when rendered by a participating network provider. Qualifying coverage may be determined by age, gender or other factors. There could be certain codes not payable in all circumstances due to other policies or guidelines, including coverage limitations or exclusions, and/or certification may be required for coverage. If you receive services during a preventive care visit other than for qualifying preventive care, you may have to pay for those services.

For more details or questions on qualifying preventive care services and coverage please contact customer care at 800-323-4314 and a member advocate will be happy to assist you.

### **Preventive Services**

Service: A date in this column is when the listed rating was released, not when the benefit is effective. Abdominal Aortic Aneurysm	Code(s): Certain codes may not be payable in all circumstances due to other policies or guidelines; certification may be required.  Procedure Code(s):	Preventive Benefit Instructions:  Age 65 through 75 (ends on 76th
USPSTF Rating (December 2019): B The USPSTF recommends 1-time screening for abdominal aortic aneurysm (AAA) with ultrasonography in men aged 65-75 years who have ever smoked.	Ultrasound Screening Study for Abdominal Aortic Aneurysm: 76706  Diagnosis Code(s): F17.210, F17.211, F17.213, F17.218, F17.219, Z87.891	birthday).  Requires at least one of the diagnosis codes listed in this row
Bacteriuria Screening  USPSTF Rating (September 2019): A The USPSTF recommends screening for asymptomatic bacteriuria using urine culture in pregnant persons.	Procedure Code(s): 81007, 87086, 87088  Diagnosis Code(s): Pregnancy Diagnosis Codes	Requires a Pregnancy Diagnosis Code.
Chlamydia Infection Screening  USPSTF Rating (September 2021): B The USPSTF recommends screening for chlamydia in all sexually active women 24 years or younger and in women 25 years or older who are at increased risk for infection.  Notes:  * This recommendation applies to all sexually active adolescents and adult women, including pregnant women.  * Bright Futures recommends STI screening be conducted if risk assessment is positive between ages 11-21 years.	Procedure Code(s): Chlamydia Infection Screening: 86631, 86632, 87110, 87270, 87320, 87490, 87491, 87492, 87801, 87810  Blood Draw: 36415, 36416 Blood draw codes only apply to lab codes 86631 or 86632  Diagnosis Code(s): Pregnancy: Pregnancy Diagnosis Code OR Screening: Adult: Z00.00, Z00.01 Child: Z00.121, Z00.129 Other: Z11.3, Z11.4, Z11.8, Z11.9, Z20.2, Z20.6, Z29.81, Z72.51, Z72.52, Z72.53	Chlamydia Infection Screening: Requires a Pregnancy Diagnosis Code OR one of the Screening diagnosis codes listed in this row.  Blood Draw: Required to be billed with 86631 or 86632 AND - One of the Screening diagnosis codes listed in this row OR - With a Pregnancy Diagnosis Code.
USPSTF Rating (September 2021): B The USPSTF recommends screening for gonorrhea in all sexually active women 24 years or younger and in women 25 years or older who are at increased risk for infection.  Note: Bright Futures recommends STI screening be conducted if risk assessment is positive between ages 11-21 years.	Procedure Code(s): 87590, 87591, 87592, 87801, 87850  Diagnosis Code(s): Pregnancy: Pregnancy Diagnosis Codes OR Screening: Adult: Z00.00, Z00.01 Child: Z00.121, Z00.129 Other: Z11.3, Z11.4, Z11.9, Z20.2, Z20.6, Z29.81, Z72.51, Z72.52, Z72.53	Requires either a Pregnancy Diagnosis Code <b>OR</b> one of the Screening diagnosis codes listed in this row.
Hepatitis B Virus Infection Screening  Pregnant Women: USPSTF Rating (July 2019): A The USPSTF recommends screening for hepatitis B virus (HBV) infection in	Procedure Code(s): Hepatitis B Virus Infection Screening: 86704, 86706, 87340, 87341, 87467, G0499  Blood Draw: 36415, 36416	Hepatitis B Virus Infection Screening: Requires a Pregnancy Diagnosis Code or one of the Screening diagnosis codes listed in this row.

pregnant women at their first prenatal visit.  Persons at High Risk: USPSTF Rating (Dec. 2020): B The USPSTF recommends screening for hepatitis B virus (HBV) infection in persons at high risk for infection.  Bright Futures (Jul. 2022) Bright Futures recommends screening between the ages 0-21 years [perform risk assessment for hepatitis B virus (HBV) infection.	Diagnosis Code(s):  Pregnancy:  Pregnancy Diagnosis Codes  OR  Screening:  Adult: Z00.00, Z00.01  Child: Z00.121, Z00.129  Other: Z11.3, Z11.4, Z11.59, Z20.2, Z20.6, Z29.81, Z57.8, Z72.51, Z75.52, Z72.53	Blood Draw: Requires one of the listed Hepatitis B Virus Infection Screening procedure codes listed in this row AND - A Pregnancy Diagnosis Code OR - One of the Screening diagnosis codes listed in this row.
Hepatitis C Virus Infection Screening  USPSTF Rating (March 2020): B The USPSTF recommends screening for hepatitis C virus infection in adults aged 18-79 years.  Bright Futures (March 2021): Bright Futures recommends screening all individuals ages 18 to 79 years at least once for hepatitis C virus (HCV) infection.	Procedure Code(s): Hepatitis C Virus Infection Screening: 86803, 86804, G0472  Blood Draw: 36415, 36416  Diagnosis Code(s): Does not have diagnosis code requirements for the preventive benefit to apply.	Hepatitis C Virus Infection Screening: Does not have diagnosis code requirements for the preventive benefit to apply.  Blood Draw: Requires one of the Hepatitis C Virus Infection Screening procedure codes listed in this row.
HIV (Human Immunodeficiency Virus) Screening for Adolescents and Adults  USPSTF Rating (June 2019): A The USPSTF recommends that clinicians screen for HIV infection in: Adolescents and adults ages 15-65 years. Younger adolescents and older adults who are at increased risk should also be screened. All pregnant persons, including those who present in labor or at delivery whose HIV status is unknown.  Note: Bright Futures recommends HIV screening lab work be conducted at least once between ages 15-21 years. Also recommended anytime between ages 11-14 years, when a risk assessment is positive. And after initial screening, youth at increased risk of HIV infection should be retested annually or more frequently if	Procedure Code(s): HIV (Human Immunodeficiency Virus) Screening: 86689, 86701, 86702, 86703, 87389, 87390, 87391, 87534, 87535, 87536, 87537, 87538, 87539, 87806, G0432, G0433, G0435, G0475, S3645  Blood Draw: 36415, 36416  Diagnosis Code(s): Pregnancy: Pregnancy Diagnosis Codes OR Screening: Adult: Z00.00, Z00.01 Child: Z00.121, Z00.129, Other: Z11.3, Z11.4, Z11.59, Z11.9, Z20.2, Z20.6, Z22.6, Z22.8, Z22.9, Z29.81, Z72.51, Z72.52, Z72.53  Refer also to the Expanded Women's Preventive Health section.	No age limits.  HIV – Human Immunodeficiency Virus – Screening: Requires a Pregnancy Diagnosis Code OR one of the Screening diagnosis codes listed in this row.  Blood Draw: Requires both of the following: - One of the listed HIV Screening procedure codes listed in this row AND - One of the Screening diagnosis codes listed in this row OR a Pregnancy Diagnosis Code
at high risk.  RH Incompatibility Screening  USPSTF Rating (Feb. 2004): A Rh (D) blood typing and antibody testing for all pregnant women during their first visit for pregnancy-related care.	Procedure Code(s): RH Incompatibility Screening: 86850, 86901  Blood Draw: 36415, 36416	RH Incompatibility Screening: Requires a Pregnancy Diagnosis Code.  Blood Draw: Required to be billed with 86901 AND with a Pregnancy Diagnosis

Code.

Diagnosis Code(s):

USPSTF Rating (Feb. 2004): B Repeated Rh (D) antibody testing for all unsensitized Rh (D)-negative women at 24-28 weeks' gestation, unless the biological father is known to be Rh (D)-negative.	Pregnancy Diagnosis Codes	
Syphilis Screening	Procedure Code(s): Syphilis Screening:	Syphilis Screening: Requires a Pregnancy Diagnosis
Non-Pregnant Adults and Adolescents at Increased Risk: USPSTF Rating (Sept. 2022): A The USPSTF recommends screening for syphilis infection in persons who	86592, 86593, 86780, 0064U, 0065U, 0210U  Blood Draw: 36415, 36416  Diagnosis Code(s):	Code <b>OR</b> one of the Screening diagnosis codes listed in this row.  Blood Draw:
are at increased risk for infection. <u>USPSTF Rating (May 2025): A</u>	Pregnancy: Pregnancy Diagnosis Codes OR	Requires <b>both</b> of the following: One of the listed Syphilis Screening procedure codes
The USPSTF recommends early, universal screening for syphilis infection during pregnancy; if an individual is not screened early in pregnancy, the USPSTF recommends screening at the first available opportunity.	Screening: Adult: Z00.00, Z00.01 Child: Z00.121, Z00.129 Other: Z11.2, Z11.3, Z11.4, Z11.9, Z20.2, Z20.6, Z29.81, Z72.51, Z72.52, Z72.53	listed in this row AND One of the Screening diagnosis codes listed in this row OR a Pregnancy Diagnosis Code.
Note: Bright Futures recommends sexually transmitted infection screening be conducted if risk assessment is positive between ages 11-21 years.		
Genetic Counseling and Evaluation	Genetic Counseling and Evaluation	Genetic Counseling and
for BRCA Testing; and BRCA Lab Screening	Procedure Code(s):  Medical Genetics and Genetic Counseling Services: 96041, S0265	Evaluation  May require genetic counseling before BRCA Lab Screening.
USPSTF Rating (Aug. 2019): B The USPSTF recommends that primary care clinicians assess women with a personal or family history of breast, ovarian, tubal, or peritoneal cancer or who have an ancestry	Evaluation and Management (Office Visits): 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99385, 99386, 99387, 99395, 99396, 99397, 99417, G0463  Diagnosis Code(s):	Requires one of the Genetic Counseling and Evaluation diagnosis codes listed in this row in the primary position.
associated with breast cancer susceptibility 1 and 2 (BRCA1/2)	Z15.01, Z15.02, Ž80.3, Z80.41, Z85.3, Z85.43	Limited to any test you we well as
gene mutations with an appropriate brief familial risk assessment tool.	Procedure Code(s): BRCA Lab Screening:	Limited to one test per member, per lifetime.
Women with a positive result on the risk assessment tool should receive genetic counseling and, if indicated after counseling, genetic testing.	81162, 81163, 81164, 81165, 81166, 81167, 81212, 81215, 81216, 81217 Blood Draw:	BRCA Lab Screening: Certification requirements apply to BRCA lab screening.
and counseling, genetic testing.	36415, 36416	Blood Draw:
	Diagnosis Code(s): Family History or Personal History of breast cancer and/or ovarian cancer: Z15.01, Z15.02, Z80.3, Z80.41, Z85.3, Z85.43	Requires one of the BRCA Lab Screening procedure codes listed in this row AND one of the BRCA Lab Screening diagnosis codes listed in this row.
Pre-Diabetes and Type 2 Diabetes Screening	Procedure Code(s):  Diabetes Screening: 82947, 82948, 82950, 82951, 82952, 83036	Limited to age 35-70 years (ends on 71st birthday).
USPSTF Rating (August 2021): B The USPSTF recommends screening for prediabetes and type 2 diabetes in adults aged 35 to 70 years who have	Blood Draw: 36415, 36416	Diabetes Screening: Requires one of the Required Diagnosis Codes listed in this row AND one of the listed

overweight or obesity. Clinicians should offer or refer patients with prediabetes to effective preventive interventions.  Also see Behavioral Counseling section in Primary Care to Promote a Healthful Diet and Physical Activity for Cardiovascular Disease Prevention in Adults with Cardiovascular Risk Factors for intensive behavioral counseling interventions.  For additional diabetes screening benefits, refer also to the Expanded Women's Preventive Health section for Screening for Gestational Diabetes Mellitus and Screening for Diabetes Mellitus After Pregnancy.	Diagnosis Code(s): Required Diagnosis Codes (requires at least one): Z00.00, Z00.01, Z13.1 AND One of the following additional diagnosis codes as follows: (requires at least one):  Overweight: E66.3, Z68.25, Z68.26, Z68.27, Z68.28, Z68.29 Obesity: E66.01, E66.09, E66.1, E66.2, E66.811, E66.812, E66.813, E66.89, E66.9, E88.82, Z68.41, Z68.42, Z68.43, Z68.44, Z68.45 Body Mass Index 30.0 – 39.9: Z68.30, Z68.31, Z68.32, Z68.33, Z68.34, Z68.35, Z68.36, Z68.37, Z68.38, Z68.39 Body Mass Index 40.0 and Over: Z68.41, Z68.42, Z68.43, Z68.44, Z68.45  Pre-Diabetes Preventive Interventions Procedure Code(s): Medical Nutrition Therapy or Counseling: 97802, 97803, 97804, G0270, G0271  Preventive Medicine Individual Counseling: 99401, 99402, 99403, 99404  Behavioral Counseling or Therapy: G0447, G0473  Diagnosis Code(s): R73.03 (prediabetes)	Additional Diagnosis Codes in this row.  Blood Draw: Requires ALL of the following: - One of the listed Diabetes Screening procedure codes listed in this row AND - One of the listed Required Diagnosis Codes AND - One of the listed Additional Diagnosis Codes.  Preventive Benefit Does Not Apply: If a Diabetes Diagnosis Code is present in any position, the preventive benefit does not apply; refer to the Diabetes Diagnosis Code List.  Pre-Diabetes Preventive Interventions Limited to age 35-70 years (ends on 71st birthday). Requires diagnosis code 73.03.
Gestational Diabetes Mellitus Screening  USPSTF Rating (Aug. 2021) B: The USPSTF recommends screening for gestational diabetes mellitus in asymptomatic pregnant persons at 24 weeks of gestation or after.  Also see Screening for Gestational Diabetes Mellitus and Screening for Diabetes Mellitus After Pregnancy.	Refer to the expanded Women's Preventive Health section for Screening for Gestational Diabetes Mellitus codes.	Refer to the expanded Women's Preventive Health section for Screening for Gestational Diabetes Mellitus preventive benefit instructions.  Note: This benefit applies regardless of the gestational week.
Screening Mammography  USPSTF Rating (Apr. 2024): B The USPSTF recommends biennial screening mammography for women aged 40 to 74 years  Also see Breast Cancer Screening for Average-Risk Women.	Procedure Code(s): 77063, 77067  Revenue Code: 0403  Diagnosis Code(s): Does not have diagnosis code requirements for the preventive benefit to apply.	No age limits.  Note: This benefit only applies to screening mammography.  Note: For HB1389, this benefit is effective 10/01/2025.**  In accordance with HB1389, HealthChoice will waive member cost share for all network and non-network Screening Mammography services listed, including copays, deductible, and coinsurance. Non-network services remain subject to

	<del>-</del>	<del>_</del>
		balance billing. All other preventive services are processed in accordance with qualifying preventive service
		provisions.
Diagnostic Mammography	Procedure Code(s):	No age limits.
Oklahoma HB3504 (May 2022) Effective 11/1/2022 - Health Benefit plans shall include coverage for a	Diagnostic Mammogram 77061, 77062, 77065, 77066, G0279, <b>Q9967</b> , <b>S8080</b>	MRI of the breast, with or without contrast material.
low-dose mammography screening for detection of the presence of occult breast cancer and a diagnostic	Ultrasound 76641, 76642	Note: For HB3504, this benefit is effective 10/1/2022. This benefit only applies to

cancer should be an individual one.		84152, 84153, 84154, G0102,
Before deciding whether to be		G0103
screened, men should have an		
opportunity to discuss the potential		
benefits and harms of screening with		
their clinician and to incorporate their		
values and preferences in the		
decision. Screening offers a small		
potential benefit of reducing the		
chance of death from prostate cancer		
in some men. However, many men		
will experience potential harms of		
screening, including false-positive		
results that require additional testing		
and possible prostate biopsy; over		
diagnosis and overtreatment; and		
treatment complications, such as		
incontinence and erectile dysfunction.		
In determining whether this service is		
appropriate in individual cases,		
patients and clinicians should		
consider the balance of benefits and		
harms on the basis of family history,		
race/ethnicity, comorbid medical		
conditions, patient values about the		
benefits and harms of screening and		
treatment-specific outcomes, and		
•		
other health needs. Clinicians should		
not screen men who do not express a		
preference for screening.

(Bright Futures).		
Screening for Visual Impairment in Children  USPSTF Rating (Sept. 2017): B The USPSTF recommends vision screening at least once in all children aged 3 to 5 years to detect amblyopia or its risk factors.  Bright Futures: Visual acuity screening is recommended for age 4 and 5 years as well as in cooperative 3 year olds.  Instrument-based screening recommended for age 12 and 24 months, in addition to the well visits at 3-5 years of age.	Procedure Code(s): Visual Acuity Screening (e.g., Snellen chart): 99173 Instrument-Based Screening: 99174, 99177 Diagnosis Code(s): Refer to the Preventive Benefit Instructions.	Visual Acuity Screening (99173): Up to age 21 years (ends on 22nd birthday). Does not have diagnosis code requirements for preventive benefits to apply.  Instrument-Based Screening (99174 and 99177): Age 1 to 5 (ends on 6th birthday): Does not have diagnosis code requirements for preventive benefits to apply.  Age 6 to 21 years (ends on 22nd birthday): HealthChoice follows the UHC Medical Policy titled Omnibus Codes for allowable diagnoses
Behavioral Counseling to Prevent Skin Cancer  USPSTF Rating (March 2018): B The USPSTF recommends counseling young adults, adolescents, children and parents of young children about minimizing exposure to ultraviolet (UV) radiation for persons ages 6 months to 24 years with fair skin types to reduce their risk of skin cancer.	N/A	This service is included in a preventive care wellness examination or focused E&M visit.
Falls Prevention in Community- Dwelling Older Adults: Interventions  USPSTF Rating (June 2024): B	N/A	This service is included in a preventive care wellness examination or focused E&M visit.

The USPSTF recommends exercise interventions to prevent falls in community-dwelling adults 65 years or older who are at increased risk for falls.  Screening for Intimate Partner	N/A	This service is included in a
Violence and Caregiver Abuse of Older or Vulnerable Adults  USPSTF Rating (June 2025): B The USPSTF recommends that clinicians screen for intimate partner violence (IPV) in women of reproductive age, including those who are pregnant and postpartum.  Also see Screening and Counseling for Interpersonal and Domestic Violence.		preventive care wellness examination.
Screening for Lung Cancer with Low-Dose Computed Tomography  USPSTF Rating (Mar. 2021): B The USPSTF recommends annual screening for lung cancer with low-dose computed tomography (LDCT) in adults aged 50 to 80 years who have a 20 pack-year smoking history and currently smoke or have quit within the past 15 years. Screening should be discontinued once a person has not smoked for 15 years or develops a health problem that substantially limits life expectancy or the ability or willingness to have curative lung surgery.	Procedure Code(s): 71271  Diagnosis Code(s): F17.210, F17.211, F17.213, F17.218, F17.219, Z87.891	Requires one of the diagnosis codes listed in this row.  Limitations: Limited to one per calendar year and  * All of the following criteria:  * Age 50 to 80 years (ends on 81st birthday), and  * At least 30 pack-years* of smoking history, and  * Either a current smoker or has quit within the past 15 years  *A pack-year is a way to measure the amount a person has smoked over a long period of time. It is calculated by multiplying the number of packs of cigarettes smoked per day by the number of years the person has smoked. For example, 1 pack year is equal to smoking 1 pack per day for 1 year, or 2 packs per day for half a year, and so on. #### Prevention of Acquisition of Human Immunodeficiency Virus (HIV): Pre-exposure Prophylaxis

USPSTF Rating (Aug. 2023): A
The USPSTF recommends that
clinicians prescribe preexposure
prophylaxis A using effective
antiretroviral therapy to persons at
increased risk of HIV acquisition to
decrease the risk of acquiring HIV.

Note: This Includes:

- \* Kidney function testing (creatinine)
- \* Serologic testing for hepatitis B and

C virus

- \* Testing for other STIs
- \* Pregnancy testing when appropriate
- \* Ongoing follow-up and monitoring including HIV testing every 3 months

Refer to the plan's pharmacy benefit plan administrator for details on prescription medications available under the plan's preventive benefit.

#### **Procedure Code(s):**

Kidney Function Testing (Creatinine): 82565, 82575

Pregnancy Testing: 81025, 84702, 84703

Service: A date in this column reflects when the listed rating was issued.	Code(s): Certain codes may not be payable in all circumstances due to other policies or guidelines; certification may be required.	Preventive Benefit Instructions:
Well-Woman Visits  HRSA WPSI Requirement (Dec. 2021): Recommends that women receive at least one preventive care visit per year beginning in adolescence and continuing across the lifespan to ensure the provision of all recommended preventive services, including preconception and many services necessary for prenatal and interconception care, are obtained. The primary purpose of well-woman visits is the delivery and coordination of recommended preventive services as determined by age and risk factors. These services may be completed at a single or as part of a series of visits that take place over time to obtain all	Procedure Code(s): Well-Woman Visits: Refer to the Wellness Examinations row in the Preventive Care Services section.	Well-Woman Visits: Refer to the Wellness Examinations row in the Preventive Care Services section
	Prenatal Office Visits: Evaluation and Management (Office Visits): 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99417, G0463	Prenatal Office Visits: Requires a Pregnancy Diagnosis Code.
	Pelvic Examination (add-on code): 99459	Pelvic Examination add-on code 99459: Preventive care services benefits may apply to 99459 when the related evaluation and management (office visit) code is applied to the preventive care services benefit. If not billed with the appropriate preventive E&M code, CPT code 99459 will process at standard benefits.
necessary services depending on a woman's age, health status, reproductive health needs, pregnancy status, and risk factors. Well-woman	Prenatal Care (Antepartum) Visits: 59425, 59426	Prenatal Care (Antepartum) Visits:  Does not have diagnosis code requirements for the preventive benefit to apply
visits also include pre-pregnancy, prenatal, postpartum and interpregnancy visits.  Also see Wellness Examinations and other USPSTF recommendations during pregnancy in the Preventive Care Services section.	<b>Global Obstetrical Codes:</b> 59400, 59510, 59610, 59618	Global Obstetrical Codes: The routine, low-risk, prenatal visits portion of the code is covered as preventive. Mellitus  HRSA Requirement (Jan. 2023):	Procedure Code(s): Diabetes Screening: 82947, 82948, 82950, 82951, 82952, 83036	Diabetes Screening: Requires a Pregnancy Diagnosis Code (regardless of gestational week).  Blood Draw:

•		
Recommends screening pregnant women for gestational diabetes mellitus after 24 weeks of gestation (preferably between 24 and 48 weeks of gestation) to prevent adverse birth outcomes. WPSI recommends screening pregnant women with risk factors for type 2 diabtes or GDM before 2 weeks of gestation - ideally at the first prenatal visit.  Also see <u>Diabetes Screening</u> and <u>Gestational Diabetes Mellitus Screening</u> sections and <u>Screening for Diabetes</u> Mellitus After Pregnancy section.	Blood Draw: 36415, 36416  Diagnosis Code(s): Refer to the Pregnancy Diagnosis Codes.	Requires one of the diabetes screening procedure codes listed in this row AND one of the Pregnancy Diagnosis Codes.  Note: If a diabetes diagnosis code is present in any position, the preventive benefit will not be applied. Refer to the Diabetes Diagnosis Code List.
Screening for Diabetes Mellitus After	Procedure Code(s):	Diabetes Screening:
HRSA Requirement (Jan. 2023): Recommends screening for type 2 diabetes in women with a history of gestational diabetes mellitus (GDM) who are not currently pregnant and who have not previously been diagnosed with type 2 diabetes. Initial testing should ideally occur within the first year postpartum and can be conducted as early as 4-6 weeks postpartum. Women who were not screened in the first year postpartum or those with a negative initial postpartum screening test result should be screened at least every 3 years for a minimum of 10 years after pregnancy. For those with a positive screening test result in the early postpartum period, testing should be repeated at least 6 months postpartum to confirm the diagnosis regardless of the type of initial test (e.g., fasting plasma glucose, hemoglobin A1c, in the first 6 months postpartum regardless of whether the test results are positive or negative because the hemoglobin A1c test is less accurate during the first 6 months postpartum.  Also see Gestational Diabetes Mellitus Screening, Diabetes Screening, and Screening for Gestational Diabetes	Diabetes Screening: 82947, 82948, 82950, 82951, 82952, 83036  Blood Draw: 36415, 36416  Diagnosis Code(s): Required Screening Diagnosis Codes (requires at least one): Z00.00, Z00.01, Z13.1  AND requires the following additional code: Additional Diagnosis Code Required: Z86.32 (personal history of gestational diabetes)	Requires one of the Required Screening diagnosis codes listed in this row AND Z86.32.  No age limitation.  Blood Draw: Requires one of the Diabetes Screening procedure codes listed in this row AND one of the Required Screening diagnosis codes listed in this row AND Z86.32.  Note: If a diabetes diagnosis code is present in any position, the preventive benefit will not be applied. Refer to the Diabetes Diagnosis Code List.

Recommends that adolescent and adult women have access to the full range of contraceptives and contraceptive care to prevent unintended pregnancies and improve birth outcomes. Contraceptive care includes screening, education, counseling, and provision of contraceptives (including in the postpartum period). Contraceptive care also includes follow-up care (e.g., management, evaluation and changes, including the removal, continuation, and discontinuation of contraceptives). WPSI recommends that the full range of U.S. Food and Drug Administration approved, granted, or cleared contraceptives, effective family planning practices, and sterilization procedures be available as part of contraceptive care. The full range of contraceptives includes those currently listed in the FDA's Birth Control Guide:

- 1) sterilization surgery for women
- 2) implantable rods
- 3) copper intrauterine devices
- 4) intrauterine devices with progestin (all durations and doses)
- 5) injectable contraceptives
- 6) oral contraceptives (combined pill)
- 7) oral contraceptives (progestin only)
- 8) oral contraceptives (extended or continuous use)
- 9) the contraceptive patch
- 10) vaginal contraceptive rings
- 11) diaphragms
- 12) contraceptive sponges
- 13) cervical caps
- 14) condoms
- 15) spermicides
- 16) emergency contraception (levonorgestrel)
- 17) emergency contraception (ulipristal acetate), and any additional contraceptives approved, granted, or cleared by the FDA.

For counseling and follow up care, refer to the <u>Wellness Examinations</u> row in the Preventive Care Services section.

### Code Group 1 Procedure Code(s):

Sterilizations:

Tubal Ligation, Oviduct Occlusion: 58600, 58605, 58611, 58615, 58670, 58671, A4264

(Refer to Code Group 4 below for Tubal Ligation Follow-up)

Contraceptive Methods: Diaphragm or Cervical Cap: 57170, A4261, A4266

IUD (Kyleena®): J7296 IUD (Liletta®): J7297 IUD (copper): J7300 IUD (Skyla®): J7301

(Refer to Code Group 2 below for additional IUD codes).

#### Code Group 1:

Does not have diagnosis code requirements for preventive benefits to apply.

#### Code Group 2 Procedure Code(s):

Contraceptive Methods:

Implantable Devices:

J7306, J7307, 11976 (capsule removal), 11981 (implant insertion), 11982 (implant removal), 11983 (removal with reinsertion)

IUDs:

J7298 (Mirena®), S4989, 58300, S4981 (insertion), 58301 (removal) (Refer to Code Group 1 above for additional IUD codes)

Iniections:

J1050 (injection) 96372 (admin)

#### Code Group 2 Diagnosis Code(s):

These are required for Code Group 2. Contraceptive Management: Z30.012, Z30.013, Z30.014, Z30.017, Z30.018, Z30.019, Z30.09, Z30.40, Z30.42, Z30.430, Z30.431, Z30.432, Z30.433, Z30.46, Z30.49, Z30.8, Z30.9

#### Code Group 2:

Requires one of the Code Group 2 diagnosis codes listed in this row.

Breast Cancer Screening for Average-Risk Women  HRSA Requirement (Dec. 2016): Recommends that average-risk women initiate mammography screening no earlier than age 40 and no later than age 50. Screening mammography should occur at least biennially and as frequently as annually. Screening should continue through at least age 74 and age alone should not be the basis to discontinue screening. These screening recommendations are for women at average risk of breast cancer. Women at increased risk should also undergo periodic mammography screening; however, recommendations for additional services are beyond the scope of this recommendation.	Refer to the Screening Mammography row in the Preventive Care Services section.	Refer to the Screening Mammography row in the Preventive Care Services section.
Screening for Cervical Cancer	Human Papillomavirus DNA Testing	Human Papillomavirus DNA Testing
HRSA Requirement (Dec. 2016):	(HPV):	(HPV)
Recommends cervical cancer screening for average-risk women aged 21 to 65 years. For women aged 21 to 29 years recommends cervical cancer screening using cervical cytology (Pap test) every 3 years. Co-testing with cytology and human papillomavirus testing is not recommended for women younger than 30 years. Women aged 30 to 65 years should be screened with cytology and HPV testing every 5 years or cytology alone every 3 years. Women who are at average risk should not be screened more than once every 3 years.
