Subject: Proposed Repower of Grant Plains Wind Facility and Grant Wind Facility

Dear Mr. Galloway,

Southern Power owns and operates two existing wind facilities in Grant County, Oklahoma. The two wind facilities are Grant Plains Wind Facility (64 turbines) and Grant Wind Facility (66 turbines). Southern Power is planning to repower a portion of the turbines at these two facilities. As a part of this repowering process, Southern Power has submitted to the Federal Aviation Administration FAA form 7460-1 for the construction of the proposed repowers (ASN 2024-WTW-13478-OE through 2024-WTW-13607-OE). Southern Power has received Determinations of No Hazards (DNH) from the FAA for all 130 turbine locations.

While we submitted Form 7460-1 for all turbine locations, only a portion of the facilities will be repowered. A portion of the facility will remain as-is and a portion will be removed. We will send an updated table as the project progresses.

Please see the attached list of FAA case numbers, table with structure details, and copies of Determinations of No Hazards. Kyle Johnson will serve as the point of contact for Southern Power. Please see my contact information below.

Sincerely,

Kyle Johnson
