AND ENVIRONMENT

OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE

3400 DEFENSE PENTAGON
WASHINGTON, DC 20301-3400

April 25, 2025

Mr. Bryce Kuhn
NextEra
700 Universe Boulevard
Juno Beach, FL 33408

Subject: Mission Compatibility Certification Letter / ASNs: 2023-WTW-14053-OE to
2023-WTW-14109-OE

Dear Mr. Kuhn,

The Military Aviation and Installation Assurance Siting Clearinghouse (Clearinghouse) has reviewed the Breckinridge wind farm project in Breckinridge, Oklahoma. A mitigation agreement is pending execution between the Department of Defense (DoD), the North American Aerospace Defense Command (NORAD), and NextEra to resolve concerns related to the project's potential impacts on military operations and readiness. The mitigation agreement will define a geographic boundary of the project, limit the maximum number of wind turbines and meteorological evaluation towers that can be constructed, and limit the maximum height of any structure to a height agreed upon between NORAD and NextEra. In light of this agreement in coordination and to uphold support of energy development, the Clearinghouse found no adverse impacts to DoD missions in the area and has entered a determination of "No Objection with Provision" via the Federal Aviation Administration's Obstruction Evaluation / Airport Airspace Analysis system.

Our response to the FAA included a notification that further expansion beyond the current project area may be problematic due to proximity to military training routes or military training areas.

We encourage you to consult DoD well in advance of any expansion. If you have any questions, I can be reached at robbin.e.beard.civ@mail.mil.

Sincerely,

Robbin E. Beard
Acting Executive Director
Military Aviation and Installation
Assurance Siting Clearinghouse
