

AFFIDAVIT OF PUBLICATION

STATE OF OKLAHOMA, COUNTY OF CADDO, ss.

I, the undersigned, being of lawful age, being duly sworn and authorized, says that I am a duly authorized agent of *The Anadarko Daily News*, a daily newspaper printed in the English language, in the city of Anadarko, Caddo County, Oklahoma, having a paid general subscription circulation in said County, with entrance into the United States mails as second class matter in Caddo County, and published and printed in said County where delivered to the United States mail, that said newspaper has been continuously and uninterruptedly published in said County during a period of one hundred four (104) consecutive weeks immediately prior to the first publication of the attached notice, advertisement or publication; and that said newspaper comes within the requirements of Title 25, Oklahoma Statute 108 effective November 1, 1983, and complies with all other requirements of the laws of Oklahoma with reference to legal publication.

That said notice, a true copy of which is attached hereto, was published in the regular edition of said newspaper during the period and time of publication and not in a supplement, on the following dates:

February 17, 2025

By: Maximus Rhett Alexander

Subscribed and sworn before me this 17th day of February, 2025.

Public Notice

PUBLISHED IN THE ANADARKO DAILY NEWS
February 17, 2025

Pursuant to the notice requirements contained in Section 160.21 of the Oklahoma Wind Energy Development Act, 17 O.S. §§ 160.11–160.22 (OWEDA), the notice requirements contained at OAC 165:35-45-4 of the Oklahoma Corporation Commission's (Corporation Commission's) Wind Energy rules, and the notice requirements contained at OAC 25:40-3-1 of the Oklahoma Department of Aerospace and Aeronautics' (ODAA) Wind Energy Rules, Bullfrog Energy LLC, a subsidiary of Apex Clean Energy, hereby submits to the Caddo County Commissioners notification of its intent to build the Bullfrog Wind Project ("Bullfrog Wind"). Bullfrog Wind is located in Caddo County, Oklahoma. Simultaneous to this notification, a copy was sent to the Oklahoma Corporation Commission. Notice has been timely sent to the Oklahoma Department of Aerospace & Aeronautics, formerly the OAC.

The Federal Aviation Administration ("FAA") 7460-1 forms for Bullfrog Wind were submitted to the FAA on March 15, 2024 and are attached hereto as Exhibit A. The project description depicting the boundary is attached hereto as Exhibit B.

Bullfrog Energy LLC hereby attests compliance with the provisions of 17 O.S. § 160.20 (A).

Please do not hesitate to contact us with any questions regarding this filing. Sincerely,

Barrett Thomas,

Sr. Development Manager

Archaeologists unearth remains of a Roman basilica on the site of a new London skyscraper

IN THIS photo provided by MOLA, Museum of London Archaeology taken in summer 2024, a view of part of the wall of the Roman London Basilica which has been recently unearthed by a redevelopment of a City of London building in London. (MOLA via AP)

LONDON (AP) — Work to give 21st-century London yet another skyscraper has uncovered traces — in fact chunks — of the city’s origins almost 2,000 years ago.

Archaeologists exploring the site of a planned 32-story office tower announced Thursday that they have unearthed the remains of a Roman basilica that once stood at the heart of the city known as Londinium.

Excavations in the basement of a building slated to be demolished for the tower at 85 Gracechurch Street uncovered flint, brick and ragstone walls and foundations, up to 1 meter (over 3 feet) wide, 4 meters (13 feet) deep and two millennia old.

Sophie Jackson of Museum of London Archaeology called it “one of the most significant discoveries” in years in London’s oldest quarter, the City — the square-mile financial district where modern glass high-rises stand atop the remnants of Victorian, medieval and even earlier structures.

What’s been uncovered are the foundations of a two-story building, almost as big as an Olympic swimming pool. It was constructed between 78 and 84 A.D., about three decades after Roman troops invaded Britain and some 20 years after forces of the Celtic warrior queen Boudicca sacked the fledgling settlement.

The basilica was part of the forum, the social, political and commercial heart of Roman Lon-

don, where people went to shop, mingle, seek justice and hear the latest edicts from political leaders. The newly discovered remains are believed to form part of the tribunal, a raised area of the forum where politicians and officials made decisions about the city’s governance.

“It’s the beating heart of the city,” said Andrew Henderson-Schwartz, head of public impact at Museum of London Archaeology. “It kind of towers above the city. And so it’s a real symbol of Roman power and authority.

“We’re talking about the early stages of London here, but it’s a real sign of investment in the city, even in its early infancy,” he said.

Developer Hertshten Properties, which owns the site and has planning permission for a new office tower, has agreed to incorporate the remains into its plans and put them on display in a visitor center.

Henderson-Schwartz said the extent of the “absolutely massive” foundations discovered in several test pits suggests an “extraordinary” level of preservation.

Further digging could answer intriguing questions, including why the original forum was only used for 20 years before being replaced by a much larger one, which remained in use until the collapse of Roman rule in Britain three centuries later. Items such as writing tablets, styluses — even ancient trash — could give glimpses into

the daily lives of Roman Londoners.

Property developers in Britain routinely have to consult archaeologists as part of their planning process, a practice that has uncovered finds from Saxon jewelry to medieval ice skates to the skeletons of 14th-century plague victims.

The latest discovery adds to the scant traces of Roman London that can be seen around the city, including a section of ancient wall, a portion of amphitheater beneath the Guildhall and a temple to the god Mithras which lies incongruously under the modern headquarters of information company Bloomberg.

“We do have these little windows into Roman London that are all over the city,” Henderson-Schwartz said. “But this is really in some ways the site that connects them all together. This is the heart of Rome in London, where all the decisions were made.”

Today in History

In 1863, five appointees of the Public Welfare Society of Geneva announced the formation of an “International Committee for the Relief of Wounded Combatants,” which would later be renamed the International Committee of the Red Cross.

Why asteroid 2024 YR4 is unlikely to hit Earth in 2032 and how scientists keep track

CAPE CANAVERAL, Fla. (AP) — The threat of a newly discovered asteroid has risen slightly in the past few weeks, as the world’s telescopes rush to track its course. But the chance of an impact is still quite slim.

New calculations suggest there's a 2% chance the space rock 2024 YR4 will smack Earth in 2032. This also means there's a 98% chance it will safely pass our planet. The odds of a strike will almost certainly continue to go up and down as the asteroid's path around the sun is better understood, and astronomers said there's a good chance the risk likely will drop to zero.

NASA and the European Space Agency's Webb Space Telescope will observe this near-Earth asteroid in March before the object disappears from view. Once that happens, scientists will have to wait until 2028 when it passes our way again.

Asteroids are space rocks orbiting the sun that are considerably smaller than planets. Scientists believe they're the leftovers from the solar system's formation 4.6 billion years ago.

There are so many asteroids orbiting between Mars and Jupiter, millions of them, that this region is

known as the main asteroid belt. They sometimes get pushed out of the belt and can end up all over the place, like this one.

A telescope in Chile discovered the asteroid 2024 YR4 in December. It's estimated to be 130 feet to 300 feet across. Observations by the Webb telescope should provide a more precise measurement, according to NASA.

NASA and the European Space Agency initially put the odds of a strike at just over 1%. By Thursday, it had risen to roughly 2%. NASA describes that as still “extremely low.”

Until scientists have a better understanding of the asteroid's path around the sun, they caution the odds will continue to fluctuate, and quite possibly fall to zero.

“You don’t have to be worried about anything. It’s a curiosity,” said Larry Denneau, senior software engineer with the University of Hawaii's asteroid impact alert system that first spotted the asteroid. “Don’t panic. Let the process play out, and we’ll have a for-sure answer.”

In 2021, NASA gave the all-clear to another potentially worrisome asteroid, Apophis, after new telescope observations ruled out any chance of it hitting Earth in 2068.

It's way too soon to fret over this asteroid, according to the experts.

“No one should be concerned that the impact probability is rising. This is the behavior our team expected,” Paul Chodas, director of NASA's Center for Near-Earth Object Studies, said in an email. "To be clear, we expect the impact probability to drop to zero at some point.”

Since the asteroid's size and orbit are uncertain, it's unclear where it might hit and what the possible impacts would be should it strike Earth. If the asteroid is on the smaller end, ESA said any potential impacts would be local similar to the Tunguska event that flattened thousands of square miles of forest in remote Siberia in 1908. But if it's close to 330 feet, "the consequences would be significantly worse."

Chodas said once Webb pinpoints the asteroid's size, NASA can predict “how serious an impact this asteroid could produce and how difficult a task it might be to deflect this asteroid.”

NASA already has some experience nudging an asteroid. The space agency's Dart spacecraft deliberately rammed a harmless asteroid in 2022 in the first planetary defense test of its kind, altering its orbit around its larger companion asteroid.

REAL ESTATE AUCTION

WED. MARCH 5TH AT 10:00 AM SHOWN BY APPT. ONLY

AUCTION HELD AT: **DAKIL AUCTIONEERS, INC. 200 NW 114TH ST, OKLA. CITY, OKLA.**
(W. Side Service Rd of the Bdwy Ext. between 122nd & Hefner)

DEL CITY

4645 TINKER DIAGONAL, DEL CITY: Approx. 6,642 SF Building Setting on Approx. 0.37 Acres MOL with Immediate I-40 Access, Less than 5 minutes from Tinker Air Force Base or Downtown OKC. Truly One of a Kind Building. Approx. 2,800 SF of Office/Display Space Downstairs including 3 Private Offices and Ample Storage. Upstairs is a Luxury Penthouse with 2 Bedrooms, Office and Living Area, Full Kitchen, Full Bathroom w/Soaker Tub and Separate Shower, Powder Room and 3/4 Bath. Private Secure Parking w/Greenbelt. Truly Unique Property. **4400 VFW DR, DEL CITY:** Approx. 8,000 SF Masonry Commercial Building w/Asphalt Area & Greenbelt. Setting on Approx. 1.98 Acres MOL.

SHAWNEE

712 E. HIGHLAND, SHAWNEE: Auto Dealership. Approx. 1.5 Acres MOL Completely Paved with 335' Frontage on Highland. Improvements Included Approx. 13,050 SF Automotive Center which includes Approx. 5,950 SF Office Area & Approx. 7,100 SF Service Center includes Operational Paint Booth & Frame Machine. Property is zoned PUD/

3303 N. HARRISON, SHAWNEE: Approx. 4,000 SF Building. Great for Retail Space or Restaurant. Has Ample Parking and has been Recently Renovated.

3331 N. HARRISON, SHAWNEE: Approx. 4,000 SF Metal Building w/Parking, Warehouse, Etc. Fenced in Area for Storage. Location has served as a retail location for years.

3031 N. HARRISON, SHAWNEE: Approx. 2.9 Acres MOL of Raw Land. Possible Shopping Center of Housing.

GUTHRIE

221 N. 2ND ST. GUTHRIE: Approx. 30,732 SF 3-Story Building. Fully Renovated Exterior. Interior space is a blank canvas with Unlimited Possibilities for Event Center, Multi-purpose Entertainment or Church. Ample Parking with Plenty of Room for Outdoor Venues.

210 & 210 1/2 OKLAHOMA AVE, GUTHRIE: Approx. 5,200 SF Commercial/Residential Building in Historic Guthrie. Downstairs is Approx. 2,600 SF of Office/Retail Space. Upstairs is Approx. 2,600 SF Luxury Living Quarters w/Private Entrance & Private Parking. Recently Remodeled.

820 S. DIVISION ST. GUTHRIE: Approx. 5,481 SF Former Service Center Building w/Store/Office Area & 2-Overhead Doors. Setting on Approx. 1.96 Acres MOL.

TERMS: 5% down, 30 days to close. Closing cost and title insurance split 50/50. 10% Buyers premium.

Public Notice

PUBLISHED IN THE ANADARKO DAILY NEWS
February 17, 2025

Pursuant to the notice requirements contained in Section 160.21 of the Oklahoma Wind Energy Development Act, 17 O.S. §§ 160.11–160.22 (OWEDA), the notice requirements contained at OAC 165:35-45-4 of the Oklahoma Corporation Commission's (Corporation Commission's) Wind Energy rules, and the notice requirements contained at OAC 25:40-3-1 of the Oklahoma Department of Aerospace and Aeronautics' (ODAA) Wind Energy Rules, Bullfrog Energy LLC, a subsidiary of Apex Clean Energy, hereby submits to the Caddo County Commissioners notification of its intent to build the Bullfrog Wind Project ("Bullfrog Wind"). Bullfrog Wind is located in Caddo County, Oklahoma. Simultaneous to this notification, a copy was sent to the Oklahoma Corporation Commission. Notice has been timely sent to the Oklahoma Department of Aerospace & Aeronautics, formerly the OAC.

The Federal Aviation Administration ("FAA") 7460-1 forms for Bullfrog Wind were submitted to the FAA on March 15, 2024 and are attached hereto as Exhibit A. The project description depicting the boundary is attached hereto as Exhibit B.

Bullfrog Energy LLC hereby attests compliance with the provisions of 17 O.S. § 160.20 (A).

Please do not hesitate to contact us with any questions regarding this filing. Sincerely,

Barrett Thomas,
Sr. Development Manager
