Comments:

The footprint for the cultural resources assessment of this project was originally reviewed as a Screened Exemption on August 08, 2022. The assessment was based upon a study area footprint. Screened Exemptions are defined as undertakings that do not have the potential to affect historic properties [36 CFR 800.3(a)(1)]. SHPO was not consulted. The current re-evaluation of the project is due to proposed changes in the project footprint and is based on Proposed R/W Plans dated December 30, 2022. The new project boundaries were georeferenced and compared to the original 2022 cultural resources assessment. The scope of the project has not changed, and the original screened exemption review is still applicable. The proposed project was reviewed by an archaeologist who meets the Secretary of Interior Qualifications. Pursuant to 36 CFR 800.3(a)(1), the undertaking has no potential to cause effects to historic properties. There are no further cultural resources concerns.
