RE: Reconnecting Communities Pilot for the I-244 Study: A Plan to Enhance Mobility and Connectivity in North Tulsa

Honorable Secretary Buttigieg:

We are pleased to submit this letter in support of the Oklahoma Department of Transportation's (ODOT) and City of Tulsa's joint application for a Reconnecting Communities Pilot (RCP) discretionary planning grant to study I-244 in North Tulsa.

In 2022, the USA BMX National Headquarters and Hall of Fame Museum officially opened in Tulsa within the Historic Greenwood District. USA BMX will draw racers and fans from across the country and around the world and is committed to elevating youth from the Greenwood and North Tulsa community.

I-244 is the northern section of the Inner Dispersal Loop around Downtown Tulsa. While this section of Interstate Highway helps mitigate traffic congestion throughout North Tulsa it also has undesirable effects on surrounding communities. Local partners have worked on studies for future planning to improve local mobility, quality of life and equity, but have not had an opportunity to fully review options with I-244.

With RCP grant funding, ODOT and the City of Tulsa will engage these communities to identify the effects of I-244 and provide viable options to mitigate the impacts and increase connectivity across I-244. This Study will identify community connectivity solutions that remove the barriers to access, mobility, and economic development presented by I-244.

We thank you in advance for your strong consideration of ODOT's and the City of Tulsa's joint application for this RCP planning grant. Thank you and please feel free to call on us should you have questions or if you require additional information.

Sincerely,

Shane Hansen Fernandez- AIA, NCARB, LEED-AP, RCID
