

ACCESS MANAGEMENT

What is Access Management?

Access Management (AM) is the proactive management of vehicular access points to land parcels adjacent to all manner of roadways. Good access management promotes safe and efficient use of the transportation network. AM encompasses a set of techniques that state and local governments can use to control access to highways, major arterials, and other roadways. These techniques include:

- Access Spacing
- Driveway Spacing
- Safe Turning Lanes
- Median Treatments
- Right-of-Way Management
