PINNACLE PLAN MEASURES – MONTHLY SUMMARY REPORT – March 2016

The Department of Human Services (DHS) is committed to improving the safety, permanency, and well-being of children served by the child welfare system. The Pinnacle Plan is the roadmap and public reporting is critical to ensuring transparency and accountability. The [OKDHS Metrics, Baselines, and Targets Agreement -3/7/13](#) outlines how the outcomes and other indicators are to be measured and reported. Monthly, Quarterly, and Semi-Annual Reports will be made available to the public.

Oklahoma is committed to good faith efforts and positive trending toward the goals outlined in the plan. Each monthly report will include four performance areas, comprised of ten specific metric elements. These are: Foster Care Safety, Counts for New Foster Homes, Worker Contacts, and Shelter Usage. In addition to metrics public reporting, OKDHS posts [The Pinnacle Plan - Quarterly Updates](#) which provide valuable information regarding plan initiatives.

Demographics of children are included in monthly and semi-annual reports as context data. This information is helpful in understanding the population being served by the child welfare system.

Beginning with the August 2014 Monthly Report, there has been a decrease in the lag time to 30 days from the end of the reporting period to the time that the data is reported on Measure 2 – Resource Homes, Measure 3 – Frequency of Worker Contacts, and Measure 5 – Shelter Use. There will continue to be a 90-day lag time on Measure 1 – Foster Care Safety to allow time for the Program Review Process to be completed.

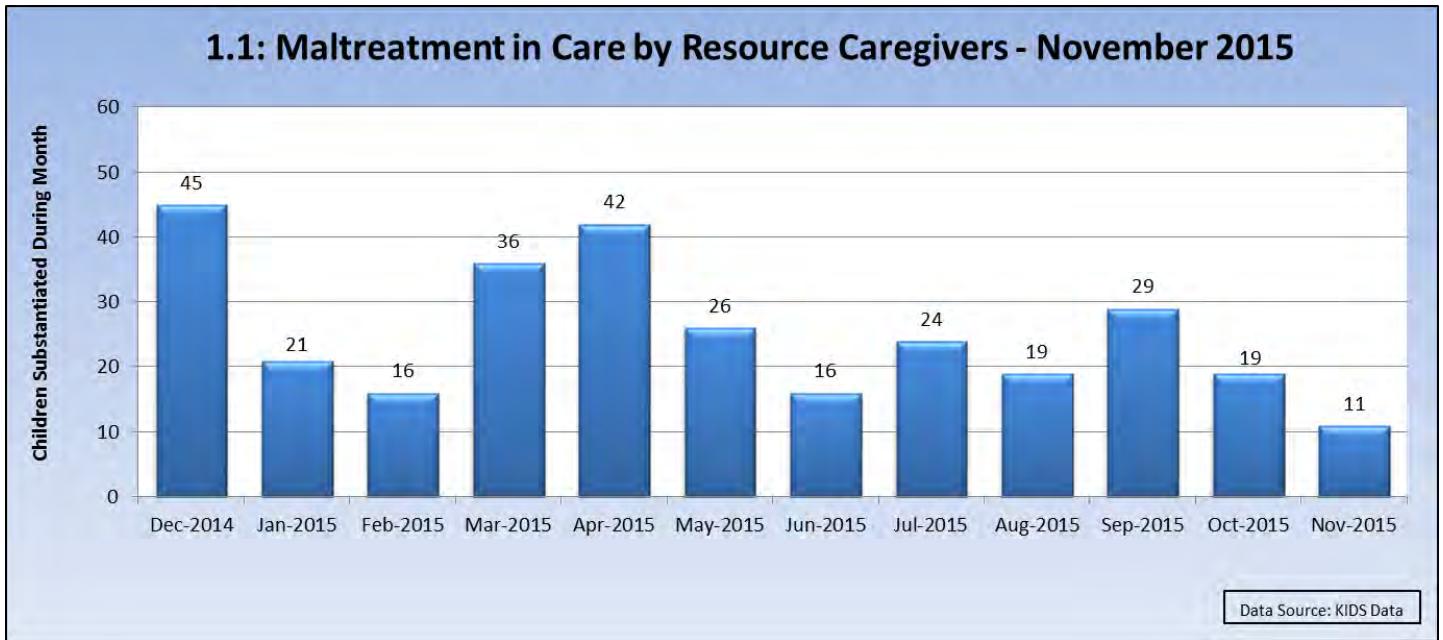

OKDHS was the first state agency to have a federally approved Statewide Automated Child Welfare Information System (KIDS System) and continues to strive for high quality data. **The data in this report is subject to change due to ongoing data entry, changes in policy, changes in practice, and changes in definitions, and/or data quality issues that may be discovered through the process.**

If you have questions or feedback regarding the Pinnacle Plan, please email us at dhs.childwelfareplan@okdhs.org

1.1: Maltreatment in Care by Resource Caregivers

	Dec-2014	Jan-2015	Feb-2015	Mar-2015	Apr-2015	May-2015	Jun-2015	Jul-2015	Aug-2015	Sep-2015	Oct-2015	Nov-2015
# of Substantiations	45	21	16	36	42	26	16	24	19	29	19	11

Data: The Maltreatment in Care Measure by Resource Caregiver incorporates a 90-day delay from the time the investigation is complete to the report date. This delay allows for further review which may result in changes in the findings. All substantiations on children in Out of Home Care will go through an automatic Program Review. The data reported reflects substantiations in the month that the investigation was completed and not necessarily in the month that the abuse or neglect occurred. This measure includes all children placed in traditional foster care homes, kinship homes (relative or non-relative), therapeutic foster care homes, group homes, shelters, and residential facilities. This measure also includes children substantiated of maltreatment by the Office of Client Advocacy while placed in institutional settings. Every time a child is a substantiated as a victim, that child will be counted in the monthly reporting. Children who are victimized more than once will be counted in each month their victimization is substantiated. Note: This is different from the federal metric, which counts each child only once, even if a child is victimized more than once in the course of a year.

Comments – March 2016: For this month, both October and November 2015 MIC are being reported. For October there were a total of 19 substantiations of Maltreatment while in Out of Home Care. These victims were reported in 9 separate referrals for children in foster care and 4 referrals to OCA. Of the 15 children placed in foster care, 1 children were placed in a CW Foster Family Care Home, 10 were placed in a CW Kinship Relative Home, and 4 were placed in a CW Kinship Non-Relative Home. Of the 4 OCA victims, 1 child was placed in a Level D+ Residential Resource Facility, 2 children were placed in a Level E Residential Resource Facility, and 1 child was placed a Psychiatric Residential Treatment Center. For November there were a total of 11 substantiations of Maltreatment while in Out of Home Care. These victims were reported in 3 separate referrals for children in foster care and 4 referrals to OCA. Of the 6 children placed in foster care, 3 children were placed in a CW Foster Family Care Home, 1 was placed in a CW Kinship Relative Home, and 2 were placed in a CW Kinship Non-Relative Home. Of the 5 OCA victims, 2 children were placed in a Level D Residential Resource Facility, 2 children were placed in a Level E Residential Resource Facility, and 1 child was placed a Youth Services Shelter.

1.2: Maltreatment in Care by Parents

	Dec-2014	Jan-2015	Feb-2015	Mar-2015	Apr-2015	May-2015	Jun-2015	Jul-2015	Aug-2015	Sep-2015	Oct-2015	Nov-2015
# of Substantiations	23	12	16	14	21	20	23	14	9	21	13	7

Data: The Maltreatment in Care by Parents measure incorporates a 90-day delay from the time the investigation is complete to the report date. This delay allows for further review which may result in changes in the findings. The data reflects substantiations in the month that the investigation was completed and not necessarily in the month that the abuse or neglect occurred.

Beginning with the November 2013 report, every time a child is a victim, that child will be counted. Children who are victimized more than once will be counted in each month their victimization is substantiated. Note: This is different from the federal metric, which counts each child only once, even if a child is victimized more than once in the course of a year. Also, beginning with the November 2013 monthly report, children who are disclosing abuse that occurred prior to coming into DHS custody will not be included in the count of monthly victims.

Comments - March 2016: For this month, both October and November 2015 MIC are being reported. In October 2015, there were 13 substantiations of abuse by parents of children in out of home care and these 13 victims were reported in 7 separate referrals. Of these 13 Victims, 12 were placed in Trial Reunification and 1 child was placed in a Level D+ Residential Resource Facility. In November 2015, there were 7 substantiations of abuse by parents of children in out of home care and these 7 victims were reported in 5 separate referrals. Of these 7 Victims, 7 were placed in Trial Reunification and 2 were placed in a CW Foster Family Care Kinship Relative Home.

2.1: New Family Foster Care Homes

	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15	Jan-16	Feb-16	Mar-16	Apr-16	May-16	Jun-16	Total
#of New FFC Homes	44	70	63	56	73	89	68	0	0	0	0	0	463

Data: Total Count of New Foster Homes includes all Foster Family Homes and Supported Foster Homes by month that they were opened using the agreed upon criteria. (This does not include Kinship or Tribal Homes.) The target for SFY2016 is 1054 new foster homes.

Comments –March 2016: In January 2016, there were 68 foster homes opened that met the Pinnacle Plan Criteria to be counted as new at the time of reporting. As of 1/31/16, there were a total of 463 new homes for SFY2016. The Foster Family Care net gain as of 1/1/16 was 107 homes for SFY2016 which is 20.0% of the yearly target. The net gain target for SFY16 is 534 homes.

**Note this number is subject to change in prior months as more homes opened in prior months meet Pinnacle Plan criteria.

2.3: New Therapeutic Foster Care Homes

7.1 Worker Caseloads Continued

Data: Utilizing the standards set forth in the Pinnacle Plan, each individual type of case is assigned a weight and then the weights are added up in order to determine a worker's caseload. The consolidated workload tracking process allows Oklahoma to factor in the worker's "Workload Capacity." The charts represent the consolidated workload tracking process. A snapshot is taken every morning at 12:00 am of the workload of all Child Welfare workers. The entire workload of workers with a qualifying assignment to a case (CPS, PP, FCS, Adoption, and Resource) are calculated and compared against the caseload standards. The workload is classified as meeting standards if it is 100% or below a caseload. If the workload is over 100% but less than 120% of a caseload, it is considered to be "over but close"; otherwise the workload is considered to be over the standard. The measure tracks each worker - each day to determine if they meet the standard, and this is called a "worker day". Work performed by Child Welfare Specialists, is broken into multiple categories. This measure will look specifically at all Child Welfare Workers (Total), Permanency Planning, Preventive/Voluntary, Investigation, Adoption, Bridge, and Comprehensive Workers. The data on Supervisors meeting unit ratio standards is still pending.

Comments – March 2016: For the period of October 1, 2015 – December 31, 2015, The total number of Child Welfare Workers meeting the standard is 55.5%, with 12.1% being "Close", and 32.4% "Over Standard". As of 1-4-16, according to the point in time YI768C Workload report, there were 60.8% of workers meeting workload standards. Of the 1501 workers, 912 workers were meeting workload standards.

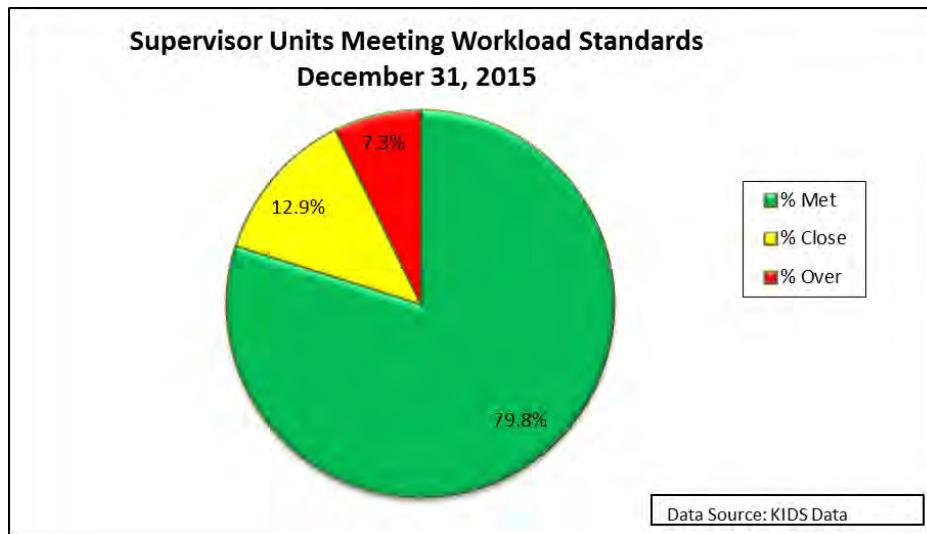

7.1 Worker Caseloads Continued

Data: The above chart represents a one day snapshot of the quarterly workload data during the quarter.

Comments – March 2016: As of 1/4/16, using the point in time YI768C Workload data report, the total number of Child Welfare Workers meeting the standard is 60.8%, with 10.5% being “Close”, and 28.8% “Over Standard”. Of the 1501 workers, 912 workers were meeting workload standards, 157 workers were close, and 432 workers were over the standard.

7.1 Worker Caseloads Continued

Data: This measure looks at Supervisor Units in regards to the worker standard per unit. There are two parts to determine if a supervisor unit meets the standard. First, the measure looks at the number of Child Welfare Workers each supervisor is currently supervising in their unit. The target is for each unit to have a ratio of 5 Child Welfare Workers to 1 Supervisor. If a Unit has a ratio of 5:1 or less, they are considered to meet the standard. Units are “Close” if they are 1-20% over with a ratio of 6:1. All Units with a ratio of 7:1 or over are considered “Over”. Each worker accounts for 0.2% of a supervisor’s workload capacity. Secondly, the measure looks at any of those supervisors who are currently supervising caseload carrying workers and also have primary assignments on their own workload. Because these workload assignments deduct from a supervisor’s capacity to supervise their workers, this additional caseload must be factored into the measurement. If a supervisor has less than two case assignments this will not be calculated into the measurement. For any other assignments on a supervisor’s caseload, these will be calculated at the same weight as a worker’s caseload and then added to the supervisor capacity, which includes the number of workers being supervised. With this combined calculation of the supervisor’s workload capacity, it is then determined how many of these supervisor units are meeting the workload standard. This information is based on KIDS ORG data and HRMD Data and is point in time as of the last date of the reporting period.

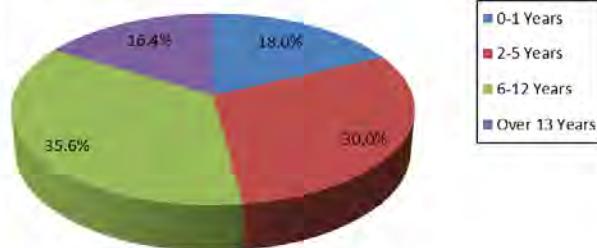

Comments – March 2016: The total number of Child Welfare Supervisor Units “Meeting the Standard” is 79.8%, with 12.9% being “Close”, and 7.3% “Over Standard”. There are 372 supervisor units with 297 units meeting the standard, 48 units close and 27 units over the standard.
