Re: Removal of Referral for Specific Preventive Codes

Dear Provider,

The Oklahoma Health Care Authority is pleased to announce that, effective July 1, 2022, a referral is no longer required for the following preventive CPT codes when provided by OB/GYN provider specialties 31/328 and 52/328:

99381	Initial comprehensive preventive medicine evaluation and management of an individual including an age and gender appropriate history, examination, counseling/anticipatory guidance/risk factor reduction interventions and the ordering of laboratory/diagnostic procedures, new patient; infant (age younger than 1 year)
99382	Early childhood (age 1 through 4 years)
99383	Late childhood (age 5 through 11 years)
99384	Adolescent (age 12 through 17 years)
99385	18 – 39 years
99386	40- 64 years
99387	65 years and older
99391	Periodic comprehensive preventive medicine reevaluation and management of an individual including an age and gender appropriate history, examination, counseling/anticipatory guidance/risk factor reduction interventions, and the ordering of laboratory/diagnostic procedures, established patient; infant (age younger than 1 year)
99392	Early childhood (age 1 through 4 years)
99393	Late childhood (age 5 through 11 years)
99394	Adolescent (age 12 through 17 years)
99395	18-39 years
99396	40-64 years
99397	65 years and older

Codes 99381-99397 are used to report the preventive evaluation and management (E/M) of infants, children, adolescents and adults. The extent and focus of the services will largely depend on the age of the patient. For example, E/M preventive services for a 28-year-old adult female may include a pelvic examination including obtaining a pap smear, breast examination and blood pressure check.
