July 15, 2006

Dear Provider,

Effective August 1, 2006 - OHCA will initiate new tiering for the bladder control categories.

Bladder Control Drugs	
In order to get a tier-2 drug, client must meet one of the following criteria: Tier-1 drug failure (i.e. inadequate clinical response or adverse effect), or Contraindication to the tier-1 drugs, or Stabilization on the tier-2 drug, or A unique indication which the tier-1 drugs lack. Patients who are currently stabilized on a Tier-2 medication will be allowed to continue their current treatment without prior authorization.	
Tier 1	Tier 2
Tolterodine (Detrol) Oxybutynin (Ditropan) Hyoscyamine (Levbid, Levsin, Cystospaz) Flavoxate (Urispas) Solifenacin (VESIcare)	Tolterodine (Detrol LA) Oxybutynin (Oyxtrol) Oxybutinin Extended-Release (Ditropan XL) Darifenacin (Enablex) Trospium (Sanctura)
*hyoscyamine can be used as adjuvant therapy only. By itself, it will not count as a tier-1 trial.	

Thank you for your continued service to Oklahoma's **SoonerCare** members.
