

# SoonerSelect

## SoonerSelect Medical Contracted Entity (CE) Change of Service Provision Summary

The SoonerSelect Medical Contract at Section 1.7: Covered Benefits and Section 1.8: Medical Management states that medical contracted entities (CEs) may not impose prior authorization guidelines/criteria or utilization management practices that are more restrictive than OHCA without OHCA prior approval.

On December 31, 2025, Humana Health Horizons in Oklahoma submitted a formal request to OHCA for review and approval to change service provisions.

OHCA subject matter experts (SMEs) reviewed the requests, evaluating them in comparison to OHCA historical processes and practices, standard business practice in other markets, and available data to determine whether to approve the requests.

OHCA decisions are noted in the table below:

<b>SoonerSelect Medical Change of Service Provision Summary</b>				
<b>PROCESS CHANGES</b>	<b>PROPOSED MODIFICATION TO PROTOCOL</b>	<b>REASON FOR PROPOSED CHANGE</b>	<b>ANTICIPATED IMPACT</b>	<b>OHCA DECISION</b>
<b>Increase Required Case Supervision for Applied Behavioral Analysis (ABA) Services</b>				
For ABA services, increase case supervision to 10% of direct treatment hours. <ul style="list-style-type: none"> <li>• 1-2 hours of case supervision for every 10 hours of direct treatment</li> <li>• If direct treatment totals less than 10 hours per week, 2 hours of supervision is required</li> </ul>	Increase in required case supervision of ABA services from 5% of direct treatment hours to 10%.	Aligning with Council of Autism Service Providers (CASP) guidelines elevate clinical standards, strengthens compliance, and enhances professional development by allowing more feedback and coaching for staff.  By adopting CASP standards and requiring more frequent case supervision, we strengthen clinical accountability, ensure services are medically necessary and evidence-based, and mitigate the risk of fraudulent or inappropriate billing.	This change will improve the quality of care through close monitoring of treatment plans, timely adjustments, and stronger adherence to evidence-based practices.  Aligning with CASP guidelines elevates clinical standards, strengthens compliance and enhances professional development by allowing more feedback and coaching for staff.	Approved
