All data are reported as close to real-time as possible, and, thus, are subject to retroactive changes due to new information, updates, ongoing investigations, and ongoing collection and confirmation of data. For all metrics, data will be updated retroactively to maintain the most accurate information. Current Value is determined based on the most recent available percent change (QOQ and YOY) and context of the overall data set, which must be considered on a per metric basis to determine status. OK Current Rank is based on most recent Oklahoma data available compared to the most recent U.S. state ranking data available; in some cases, these datasets may be from two different time periods - all ranks are best estimates based on available data and subject to change as new data becomes available.
